About Us

NEOC TECHNOLOGY COMPANY LIMITED is a technology-focused company established to provide reliable, innovative, and cost-effective services to businesses, government institutions, telecom operators, and individual clients.

We support digital transformation by delivering technology products, infrastructure solutions, professional technical services, and ongoing IT support. We help organisations improve operational efficiency, strengthen information security, enhance connectivity, and build dependable technology environments.

Through a customer-focused approach, technical expertise, and commitment to quality, we aim to become a trusted technology partner for organisations across Tanzania and the wider East African region.

VISION

To become a leading and trusted technology solutions provider in Tanzania and East Africa, recognised for innovation, reliability, service excellence, and sustainable digital transformation.

MISSION

To deliver dependable, secure, and innovative technology solutions that enable our clients to achieve their business objectives, improve productivity, reduce operational risks, and adapt to the changing digital environment.

Core Values

- **Integrity**
  Conducting business honestly, transparently, and professionally.
- **Customer Focus**
  Understanding client needs and delivering practical solutions.
- **Reliability**
  Providing dependable solutions and responsive technical support.
- **Continuous Improvement**
  Developing our skills, services, and operational processes.
- **Innovation**
  Embracing modern technologies to solve business challenges.
- **Quality**
  Maintaining high standards in products, installation, and technical services.
- **Security**
  Promoting information security and responsible technology management.

Products & Services

All equipment supplied is subject to product specifications, availability, warranty conditions, and agreed procurement terms.

01 IT Infrastructure

Servers, computers and the infrastructure work that keeps them running.

Enterprise servers and server accessories • Desktop computers, laptops, and workstations • Enterprise hardware installation and configuration • IT infrastructure upgrades and maintenance • Data centre infrastructure solutions

02 Networking & Telecommunications

Reliable communication infrastructure, from design to day-to-day maintenance.

Enterprise network design and implementation • Routers, switches, firewalls, and network accessories • Fibre-optic cabling and structured cabling • LAN, WAN, and wireless networking solutions • Network troubleshooting, optimisation, and maintenance

03 Data Centre & Enterprise Solutions

Secure, efficient and scalable IT operations for enterprise environments.

Data centre equipment supply and installation • Server and storage deployment • Enterprise switching and routing • Fibre Channel and storage-area networking (SAN) • Preventive maintenance and technical support

04 IT Consultancy & Technical Support

Informed technology decisions and reliable day-to-day IT operations.

IT infrastructure assessment and planning • Technology selection and procurement support • System installation and configuration • Network performance troubleshooting • IT maintenance and operational support

05 Electrical Equipment & Generators

Installation, testing and commissioning of electrical equipment and standby generators for uninterrupted power.

Site preparation and electrical distribution equipment • Generator positioning, mounting and power cabling • Earthing, grounding and connection to the main system • Automatic transfer switch (ATS) integration • Safety checks, functional and load testing

06 CCTV & Electric Fence

Surveillance and perimeter security to prevent unauthorised access and protect property.

CCTV installation, configuration and commissioning • Fence insulators, brackets and wire tensioning • Energiser installation and power connection • Integration with the wider security system

07 Hardware Supply & Procurement

Sourcing suitable technology products to agreed specifications and warranty terms.

Servers, storage, and computing equipment • Network switches, routers, and firewalls • Fibre-optic and structured cabling materials • IT peripherals and office technology equipment

Sectors We Serve

Telecommunications companies • Government & public sector • Banks & financial services • Corporate & private enterprises • Internet service providers • Educational institutions • Healthcare organisations • Data centres & tech providers • Small & medium enterprises

Why Choose NEOC

Customer-oriented solutions
We start from each client's requirements and recommend technology that fits them.

Technical capability
Professional installation, configuration, troubleshooting, and maintenance.

Reliable products
Equipment sourced to meet agreed technical requirements and quality expectations.

Cost-effective delivery
Practical solutions that balance performance, reliability, and budget.

Security and reliability
Protecting information systems and maintaining business continuity.

Long-term partnerships
Relationships built on trust, accountability, communication, and dependable support.

We follow appropriate technical standards, manufacturer recommendations, safe installation practices, and agreed contractual requirements. We protect client information, maintain confidentiality, and implement technology solutions responsibly.

Our Delivery Approach

1. **Requirements Assessment** – Understand the client's operational needs and technical environment.
2. **Solution Design** – Develop an appropriate technical solution and implementation plan.
3. **Procurement & Preparation** – Identify suitable products and prepare the required resources.
4. **Implementation** – Install, configure, and integrate the agreed solution.
5. **Testing & Handover** – Verify functionality and provide technical documentation.
6. **Maintenance & Support** – Provide agreed follow-up support and maintenance services.
